

Community Involvement

The intention of this effort is for each student to become personally acquainted with at least one child and one adult over the course of the semester. You have selected preliminary contacts from the list of community groups Bob has specified (see list below). This information has been recorded from the sign-up sheet posted in class with the names of those who signed up under each group. Please coordinate your efforts with other students working with the same groups with respect to time, transportation, etc.
